## 5) Storage

It is recommended that all Coated Abrasive Products should be stored at constant levels of temperature and humidity within the ranges of 18-22°C, 50-65% RH. They should be kept away from damp (or cold) walls, windows or floors to avoid possible moisture absorption. Equally storage adjacent to heat sources e.g. steam pipes, radiators, hot air ducts, ovens, etc. should be avoided.

Product is best stored in original packaging until ready for use. Shelf Life indefinite under these conditions.

## 6) Safety

Whenever possible, sanding should be carried out in a well ventilated area and it is strongly recommended that suitable goggles, dust mask and gloves are worn.

Pads should not be modified in any way. They should be used only in their original size and shape, as supplied.

**3M Flexible Abrasive Hookit™ Sheets are designed FOR PROFESSIONAL INDUSTRIAL USE ONLY.**
